

MAC Contractors is Proud to Provide Exclusive Installation of CGI Products for MAC Windows & Doors

Jon Macdonough, CEO of MAC Contractors, is pleased to work with MAC Windows & Doors as their exclusive installer for CGI brand products. "We are now able to deliver a total window & door solution that delivers better quality, price, value and installation service than other solutions currently available," said Macdonough. CGI, a Miami-based company with a 20-year history for delivering innovative, outstanding quality windows and doors. "In researching window and door products extensively and having spent several years installing different products like PGT I am very impressed with the benefits of CGI over the competition."

Specific benefits of the CGI products include:

- **A new standard in quality.** All CGI products have higher than normal design pressure ratings and other noticeable benefits over the

competition. (See back of this newsletter for comparison chart)

- **A new standard in quality.** All CGI products have higher design pressure than our competition. (See back of this newsletter for comparison chart)
- **Full-service installation** by MAC Contractors including our value engineering of each project to expedient installation and post-project follow up.
- **Competitive warranties** on windows and doors offering, in addition to standard warranties included, a 10 year warranty due to burglarized property loss through a CGI window or door.

MAC Contractors; Serving Florida's Leading Luxury Home Builders Since 2000

CGI Sentinel Product Line Installed by MAC Contractors Combines Beauty, Strength, Efficiency and Quality

Delivering an impact resistant window and/or door for a new home, or homeowner looking to upgrade, that is priced competitively yet designed to enhance a home's aesthetics and functionality, has not been available to SW Florida builders. At least, until now. CGI's Sentinel line, provided by MAC Windows & Doors and installed exclusively by MAC Contractors, is designed with many features and benefits that are both attractive and functional. Benefit from energy efficiency of Low E and/or insulated glass, matching site lines with strict attention to detail, capture sash construction and double seam weather stripping, to name a few.

"The CGI products are not only beautiful yet are strong and highly resilient," states Jon Macdonough, CEO of MAC Contractors. "Features such as 1 1/4" stainless steel screw fasteners and aluminum sections up to 30% thicker than most other frames on the market today make it a no-brainer for those who don't want to sacrifice quality and still pay competitive prices," he continues.

The Sentinel Advantage		
	PGT	Sentinel by CGI
Aluminum extensions	Thinner gauge providing less strength and sturdiness	Up to 30% higher extension thickness
Site lines	Uneven	Architecturally correct & matching
Guides	Plastic which can easily break	Block & tackle balances means no need for unsightly guides
Top Rail	Unsightly protruding	Smooth flush appearance
Fasteners	"Smaller and fewer #8, 1"" galvanized screws"	"Larger #10, 1 1/4"" stainless steel fasteners"
Balances	Exposed hardware	Hidden balances for a cleaner, neater look
Weatherstripping	One row. More likely to leak resulting in energy loss and water intrusion	Triple weather stripping creates superior energy efficiency and water infiltration protection
Frame	Open frame design reduces structural integrity.	Superior captured bottom rail u-frame for improved strength and water protection.
