PRESS RELEASE

MAC Contractors Appoints Ezio Fabrizi as New Operations Manager of Window and Door Division

Naples, FL (February 21, 2008) – MAC Contractors is pleased to announce the promotion of Ezio Fabrizi to the position of Operations Manager for its Window and Door Installation Division.

A graduate from the University of Florida, Ezio Fabrizi graduated with a Bachelors of Science in Building Construction. Upon graduation, Ezio began his career in Naples as a Project Manager working with London Bay Homes. After five years of working in the local coastal community, he noticed a need for the proper installation and waterproofing of windows and doors. Earning a Certified General Contractors license, Ezio formed Fabrizi Construction where he, and a team of experts, worked on developing such a system. Fabrizi called on MAC Contractors in 2005 for structural and interior framing, when building a home for his family. MAC's quality and craftsmanship allowed Fabrizi's home to remain completely water-proof during Hurricane Wilma. Following that, a decision was made to merge Fabrizi Construction and MAC Contractors setting up the Window and Door Installation Division.

"We are pleased to have Ezio's level of expertise and knowledge as a key component of MAC Contractors," explains Jon Macdonough, Founder of MAC Contractors. "SW Florida homeowners are demanding and they deserve the best in high quality window and door products, professional installation and exceptional customer service. Ezio has proven how we can now meet those demands."

By working together with research and development divisions of leading product manufactures, MAC continues to improve their systems and maintain a lead role in the industry.
